

# Tubes DX

Mainframe session management on the web

## Do you have these issues?

- Are your 3270 applications accessible any time, anywhere?
- Do your 3270 screens look dated?
- Is your mainframe session manager limiting progress?

## Move to Tubes

- Trusted by major global organizations
- Used by millions daily
- Secure z/OS access from a central point

## Then embrace Tubes DX

- The enhanced **D**igital **eX**perience to Tubes
- Navigate z/OS applications in browser tabs
- Just as secure - login with your mainframe credentials
- No need for Terminal emulation software
- Save time and money

## Tubes DX

- ✓ Simple and modernized access
- ✓ Each z/OS application opens in a new browser tab
- ✓ Tubes still handles security: RACF, MFA
- ✓ No duplicate user definitions in Tubes DX
- ✓ Simple deployment
- ✓ Use Sysplex Distributor if needed
- ✓ Optionally monitor by routing messages through SYSLOG
- ✓ SSO from Windows to z/OS through Kerberos

## Integrate with the hybrid world

- Speak to us to also securely manage applications with SAML, LDAP or IWA
- Open up data mining opportunities using GenAI
